Lauren Moore Turner Physiotherapist

Lauren Moore Turner has been working as a physiotherapist for more than 20 years and has enjoyed a fabulously exciting career working with both children and adults. Lauren studied in the UK and Glasgow and obtained her master's degree in Rehabilitation Science in 2002. She's worked mainly in private practice in hospitals and the community.

She has a kind and considerate manner in her approach to helping her patients achieve their goals. She has worked well with multi-disciplinary teams and has a flexible approach to helping her more challenging clients. Many of her patients have been from word-of-mouth referrals, which is a great compliment in this busy field of work.

Lauren has gained much knowledge in rehabilitation and exercise science through her years of work and supplemented this with a psychology diploma to help her special needs clients.
